manufacturing industry

About us...

- GMCtech s.r.o is an engineering company specializing in gears production
- history of the company dates back to 1990´
- GMC tech s.r.o. was established in 2006
- 2019/2020 new production site in Baška

CURRENTLY

- a complete portfolio of machines for production of standard types of gears (see on next pages)
- measuring instruments for inspection (see page num.)

Basic data

50+ employees

production site - Baška

production area > 1700m²

8700 types of products

35 production machines

turnover 2022 > over 5 million EUR

delivery worldwide

Production program

CNC turning

Marking

CNC drilling and milling

gear optimization

shaping

gear hobbing

pull broaching

repair of
industrial gears
and gearboxes

slotting

grinding

gear grinding

gear inspection on
measuring instruments

We ensure production, heat treatment, surface treatment and other technologies in within the form of cooperation. We offer transportation to our clients as well.

Gear machining

- Gleason Pfauter P600/800 > $\varnothing 1000\text{mm}$ x 1500mm length, max. module 20, CNC
- Pfauter PE80 > $\varnothing 100\text{mm}$ x 200mm length, max. module 3, CNC
- Pfauter P500 > $\varnothing 500\text{mm}$ x 500mm length, max. module 16, CNC
- Lees-Bradner > worms cutting

Gear grinding

- Gleason P600/800 G > $\varnothing 750\text{mm}$ x 1500mm
length, max. module 20, CNC
- Reishauer RZ 301S > $\varnothing 300\text{mm}$ x 400mm
length, max. module 6, CNC

Shaping

- Lorenz LS 630 > gear slotting, $\varnothing 800\text{mm}$, max. module 10, big bore ($\varnothing 800\text{mm}$) table, length of piece up to 1000 mm with diam up to 400 mm
- Lorenz LS 630 > gear slotting, $\varnothing 800\text{mm}$, max. module 10, big bore ($\varnothing 800\text{mm}$) table, length of piece up to 1200 mm with diam up to 400 mm

Pull Broaching / deburring

- Artur Klink RIW 10x1250x400
- Hoffman 2000
- Frömag RA 100/750 , key seating machine
- gear chamfering
- gear rounding

CNC turning

- Hwacheon Hi-TECH-700 > $\varnothing 700\text{mm}$ x 2000mm length, C axis and rotary tools, lunette
- Doosan Puma 5100 > $\varnothing 500\text{mm}$ x 1000mm length
- Goodway GLJ-2 > $\varnothing 200\text{mm}$ x 450mm length

- Doosan LYNX 2100LA > $\varnothing 200\text{mm}$ x 500mm length
- Doosan Puma GT2100 > $\varnothing 250\text{mm}$ x 550mm length
- Doosan Puma 2600YB > $\varnothing 350\text{mm}$ x 750mm length, C, Y axis and rotary tools
- Doosan Puma 300LMA > $\varnothing 400\text{mm}$ x 1350mm length, C axis and rotary tools, lunette

CNC drilling and milling

- Doosan DNM 6700 > vertical machining center,
work table 1500 x 670mm,
X axis 1300mm, Y axis 670mm, Z axis 670mm
and 4th rotary axis

Grinding

- TOS BUA 25/630 - round grinding, $\varnothing 250\text{mm}$ x 630mm length
- TOS BH 40A - round grinding, $\varnothing 400\text{mm}$ x 2000mm length
- BPH 300 - surface grinding machines

Gear inspection

- Wenzel LH87 - 3D measure machine
+ gear measure addition
- Gleason 475GMS - 3D measuring gears
up to 475 mm in diameter
- GearSpect DO-3 - gear inspection machine
- Hofler - double flank gear testing

Final services

MARKING

- marking by Dot pen
- laser marking
- electro marking

PACKAGING

TRANSPORTATION

Quality

- Certifications of the Quality Management System
- production is controlled by ERP software to ensure full traceability
- the circulation of documentation is controlled by barcodes
- documentation is archived for any requests by clients
- all the reports concerning product quality are provide to our clients upon request

Czech railways supplier
certification

EN ISO 9001:2015

Our objectives

- expand into foreign markets and to develop production to the satisfaction of our clients
- invest all our funds into the purchase of machines and machine equipment
- 2023/24 - investment into new grinding and hobbing machines
- improve our know-how through the education and training of our staff
